Practical Subnetting 4

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of subnets**, and allow enough extra subnets and hosts for 70% growth in all areas. Circle each subnet on the graphic and answer the questions below.

Address class B

Custom subnet mask 255.255.240.0

Minimum number of subnets needed 5

Extra subnets required for 70% growth + 4
(Round up to the next whole number)

Total number of subnets needed = 9

Number of host addresses in the largest subnet group 325

Number of addresses needed for 70% growth in the largest subnet + 228
(Round up to the next whole number)

Total number of address needed for the largest subnet = 553

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

IP address range for New York 135.126.0.0 - 135.126.15.255

IP address range for Washington D. C. 135.126.16.0 - 135.126.31.255

IP address range for Dallas 135.126.32.0 - 135.126.47.255

IP address range for Router A to Router B serial connection 135.126.48.0 - 135.126.63.255

IP address range for Router A to Router C serial connection 135.126.64.0 - 135.126.79.255

Show your work for Problem 4 in the space below.

New York needs: $325 + (325 * 0.7) = 553$ addresses/hosts

Washington needs: $220 + (220 * 0.7) = 374$ hosts

Dallas will need: $150 + (150 * 0.7) = 255$ hosts

553 = largest hosts in subnets

553 rounded = 1024

$5 + 70\% = 9$

9 rounded = 16

16 = minimum number of subnets

Practical Subnetting 6

Based on the information in the graphic shown, design a network addressing scheme that will supply the **minimum number of subnets**, and allow enough extra subnets and hosts for 20% growth in all areas. Circle each subnet on the graphic and answer the questions below.

Address class A

Custom subnet mask 255.240.0.0

Minimum number of subnets needed 7

Extra subnets required for 20% growth + 2
(Round up to the next whole number)

Total number of subnets needed = 9

Start with the first subnet and arrange your sub-networks from the largest group to the smallest.

IP address range for Science 10.16.0.0 to 10.31.255.255

IP address range for Arts & Drama 10.32.0.0 to 10.47.255.255

IP Address range Administration 10.48.0.0 to 10.63.255.255

IP address range for Router A
to Router B serial connection 10.64.0.0 to 10.79.255.255

IP address range for Router A
to Router C serial connection 10.80.0.0 to 10.95.255.255

IP address range for Router B
to Router C serial connection 10.96.0.0 to 10.111.255.255
